Data Interfaces and High Power Transceivers Support

Data Interfaces

The data interfaces can be used with OSFP modules or transceivers. For a complete list of interfaces per system, refer to [Speed and Switching Capabilities](#).

As detailed in the following table, for additional data interfaces, each OSFP port can be connected with an OSFP cable or module to SFP (Dynamix QSA™) adapters, hybrid, or splitter cables.

Model Family	Ports	Maximum Speed
SN6600	128	800GbE
	256	400GbE
	512+2	200GbE
	512+2	100GbE
	2	25GbE/10GbE/1GbE
SN6600-LD	128	800GbE
	256	400GbE
	512	200GbE
	512+2	100GbE
SN6810-LD	128	800GbE

SN6800-LD	256	400GbE
	512	200GbE
	512+2	100GbE
	2048	200GbE
	2048+8	100GbE

High Power Transceivers Support

The systems offer several high-power ports for optical transceivers that require such support. The following table specifies each system's ports max power capabilities:

Model Family	Ports	Maximum High Power Support
SN6600	64x OSFP ports	30W
	1x QSFP-112	10W
	2x SFP28	2.5W
SN6600-LD	64x OSFP ports	30W
	1x QSFP-112	10W
